

Bowenwork® For People Living With Cancer

A Continuing Education Workshop Cost: \$200 – 8 hrs

Focusing on supporting people living with cancer (PLWC), who are actively undergoing cancer treatment, in remission, or in palliative care. Learn how **Bowenwork** may act as a supportive modality to optimize quality of life and wellbeing throughout the various stages of cancer, for all clients, their families and care-givers.

This course incorporates a paradigm shift from disease management to facilitating health, wellness and 'wholeness'. By becoming more aware of issues and vulnerabilities that PLWC face in treatment and recovery, Bowenwork practitioners can become more confident in recommending Bowenwork as a safe, gentle, relaxing adjunct to conventional approaches and support clients, their families and care-givers in finding ways to cope as they navigate the cancer-management milieu.

Bowenwork is safe for all ages, acute and chronic illnesses, palliative care and hospice settings. Participants learn how Bowenwork affects the entire mind-body, no matter what state of health a person is in. Conditions that practitioners can be challenged with, respond well to this gentle therapy known for its "less is best" approach.

Why you should attend this course:

- Earn 8 hours of continuing education credits to support your current Professional Bowenwork Practitioner registration.
- Learn about using Bowenwork procedures to address common symptoms that PLWC experience from their diagnosis, treatment and side-effects, and resources that you can direct your clients towards, to empower them in improving their health, wellbeing and recovery from cancer.
- Experience creating Bowenwork session plans for fellow class participants and receiving the work.
- Your course manual is an extensive reference to show clients and healthcare practitioners the benefits that Bowenwork has to offer PLWC.

Workshop Objectives:

- Develop a greater awareness of health conditions PLWC may face, relative to various stages and treatment they are undergoing, and how Bowenwork may benefit them.
- Create a greater awareness of vulnerabilities that PLWC may have and how Bowenwork practitioners may need to adapt techniques and procedures to accommodate them.
- Develop confidence as a Bowenwork practitioner in choosing appropriate procedures and session plans for PLWC and recommending Bowenwork as a complementary modality.
- Encourage Bowenwork practitioners to become more aware of their own health care needs and incorporate wellness practices into their own lifestyles to maintain wellness, so that they can continue to be of service to their clients.

Continuing Education Credit

This workshop qualifies for 8 CE hours for national organizations such as: National Certification Board for Therapeutic Massage & Bodywork, State of California Board of Registered Nursing, Oregon Board of Naturopathic Medicine.

Prerequisites

- Bowen practitioners and students, who have completed Module 1 or beyond, may apply.
