

Online Course Outline

Anatomy and Physiology Online Plus

Vendor: Essential Training Solutions

Presentation Hours/CE Credits:

Upon completion of the course.

1. 16 ABA-endorsed continuing education hours for Professional Bowenwork Practitioners.

Note that within any two year period, Practitioners are required to take 32 continuing education hours (16 hours can be online, the remaining 16 must be hands-on class room hours)

Cost: \$200

Pre-requisites: Current annual registration. Professional Bowenwork Practitioner certification

To register: Go to <http://www.americanbowen.academy/classes/find-bowenwork-classes>. Use the pull-down menu to select Anatomy and Physiology Online Plus.

Rationale:

Course is offered to provide anatomy and physiology review and reference materials for Bowenwork Practitioners

Presentation Aims and Outcomes:

The course provides the online tutorial and self-assessments for a review of all the body systems. Practitioners can evidence their achievement by taking a copy of their grade book to show their scores, or printing off the actual completed assessments. They will need to manually record the total time spent on the course.

Specific Learning Outcomes:

Students have access to the following chapters which they can review and reference at any time:

1. Understand the organization of the body
2. Understand the anatomy, physiology and pathologies of the skin, hair and nails
3. Understand the anatomy, physiology and pathologies of the skeletal systems

4. Understand the anatomy, physiology and pathologies of the muscular system
5. Understand the anatomy, physiology and pathologies of the nervous system
6. Understand the anatomy, physiology and pathologies of the endocrine system
7. Understand the anatomy, physiology and pathologies of the respiratory system
8. Understand the anatomy, physiology and pathologies of the cardiovascular system
9. Understand the anatomy, physiology and pathologies of the lymphatic system
10. Understand the anatomy, physiology and pathologies of the digestive system
11. Understand the anatomy, physiology and pathologies of the urinary system
12. Understand the anatomy, physiology and pathologies of the reproductive system

Presentation Requirements:

This class is online. You can sign-on to your e-learning course from any PC at any time to review your progress and to continue your studies. The course provides the tutorial and self-assessments for a review of the body systems. To receive continuing education credit, students must evidence their achievement by taking a copy of their grade book to show their scores, or printing off the actual completed assessments. Student will need to manually record total time spent and turn in actual hours.

There is no live tutorial support. There is support for technical issues.

Other Resources:

This Online Plus course includes:

- 22 self-assessments for which you are told your score and your scores are permanently held in your grade book.
- Access to news forum and logs to share your ideas/tips with other users
- Free access to the ETS Resource Centre from which you can download a pack of unlabeled graphics and details of over 180 medical conditions.

Time allocation:

Student has access to the materials for one year upon enrolling in the class. This high-quality, comprehensive course is delivered totally online, is truly self-paced and no part of the course requires live attendance. Students are able to review the body systems in any order they choose.
