

Online Live Bowenwork Review

American Bowen Academy Instructors are now offering review classes of Bowenwork Modules 1 through 6 via online platforms (e.g., Skype, Ruzuku, Zoom) in order to provide continuity of training and a means to acquire hands-on continuing education hours when face-to-face classes are unable to be presented.

Cost:

\$43 per 2-hour review; \$86 per 4-hour review; \$129 per 6-hour review; \$172 per 8-hour review

CE hour credit:

One continuing education credit hour per class hour, in 2-hour increments as above

Prerequisites:

- Completion of the highest Module for which procedures are scheduled to be covered
- Software that enables two-way audio and video with the instructor
- The presence of a model on whom to demonstrate and practice the procedures

Class Aims and Outcomes:

- To provide a flexible and personalized review for Bowenwork students and practitioners wishing to refine and review procedures previously learned in Modules 1, 2, 3, 4, 5 and/or 6
- To enable students and practitioners to interact with instructors in real-time to: discuss Bowenwork procedures, observe the instructor demonstrating Bowenwork procedures, and practice procedures under the virtual supervision of the instructor

Class Set-up:

- Instructors may set up one-on-one review classes with an individual or invite multiple attendees to participate in a virtual ‘classroom’ setting to create a more collaborative experience.
- Instructors will include the following details when posting review classes on the ABA website so they can be found using the “Find a Class” search tool:
 - the number of the Module that will be reviewed
 - the date/s and time/s for scheduled reviews OR “by appointment only”
 - the number of hours (duration and CE credit)
 - the online platform/s required for connection to the instructor
- At the end of each class, the instructor will send an evaluation form to each participant for completion and transmission to the ABA Administrator. Upon receipt of the completed evaluation form, the Administrator will update the student’s Profile with the appropriate number of hours.
